

Your friends at The Bank of Orrick have been working diligently on plans to minimize any disruption in service should an emergency be declared here in Orrick.

First, if you have been considering online banking or mobile banking now would be a good time to sign up for all of our online products. We do not anticipate any disruption in our online or mobile banking products no matter what happens here in Orrick. With mobile banking we now offer mobile deposit which allows you to make a deposit simply by taking a picture of the check you are planning to deposit with your smart phone. You can also pay your bills online and avoid disruptions in mail service due to all of the road closings. We also offer Pop Money which allows you to pay individuals or they can pay you if their bank offers a similar product. All of this occurs online with no need to come to the bank.

Second, if we lose connectivity with our ATM and it must be shut down we will refund foreign ATM charges for our customers until our ATM is functional again. This will give you access to your cash the same as if you were using our ATM normally.

Third, if you have personal property in a lock box at the Bank of Orrick you should consider temporarily removing those items until this threat has passed.

Fourth, if we need to close the locations in Orrick we will not have night deposit services at either location.

Finally, if we need to move from our locations in Orrick we do have backup plans for a temporary location in Richmond. If we reach the point that we activate our evacuation plan you will be notified of our temporary location.

Again we wanted to let you know that we have been planning for a response in the event of an emergency declaration that would have an impact on our physical locations in Orrick. We will try to minimize any disruption in service during this time and appreciate your understanding and cooperation.
